

## **Congratulations**

Congratulations to Health Careers, which has been chosen as the best High School in this area, followed by Clark and O'Connor High schools, which were recognized as some of the best schools around. Northside continues to excel!

With 3,097 new students this year, Northside continues to grow at a rapid pace. Hopefully you have received and read your edition of the Northside Newsletter called LESSONS where you can learn more about additional new schools, Dedication Ceremonies and even meetings for the Committee to investigate possibilities for a new Bond as the growth continues.

Superintendent Dr. John Folks is now the President of the statewide organization for school administrators. He presided at the state convention the first week in October and a number of our students performed for everyone. They were wonderful and everyone from across the state was very impressed with their performance. Northside is very fortunate to have Dr. Folks as our Superintendent so if you see him--please thank him for the job he does.

Please feel free to attend any of our meetings which can be found on the web site or give me a call if you have questions.
