

Porsche Transmission Problems

For almost 2 years, we have waited for Mr. Briggs, owner of the San Antonio Porsche Dealership, and Mr. Burney, his attorney, to provide us the deed restrictions they promised on September 18, 2008 for the new Porsche dealership at the old Calloway property on the I-10 Access Road south of Wurzbach.

From our experience, Porsche seems to have transmission problems with community relations. Porsche is either flying by, out of control, on a 'fast track' when it needs a zoning change, or else is stuck in 'Park' in the breakdown lane when it needs to deliver on promises.
