

## **Good Neighbor – Good Fence**

In September, we were notified of a requested variance (A-10-069) for fencing around the University Health System (UHS) data center on Callaghan across from Las Palapas. Our only concern was for the type of fencing to be used; chain link fencing would not be a positive addition to the neighborhood.

Joseph E. Gonzales, A.I.A, UHS Facility Architect, readily answered our concerns by writing a letter to the association and including a picture of the type of fencing to be used. (See ‘What’s New’ on our [www.vjni.org](http://www.vjni.org) web page.)

Our thanks go to Mr. Gonzales and Ruben Lizalde, Chief of Policy, Councilman W. Reed Williams, District 8.
