

## **Difficult Times are Coming**

When the Legislative session starts this January, Northside ISD and all the other Districts in Texas are very concerned about cuts to the funding for education.

In order to begin the cuts to our budget in Northside, we have not added any new positions for two months or put Teaching "Specialists" back into classrooms. This means that a lot of the extra support for our students and teachers will not be in place any more. We are concerned as to how this will impact student learning and our Recognized District status.

It is difficult to make the progress that both Northside and the State would like with less funding. Please stay informed with this concern, and write or call your Representative and Senator and voice your concerns.
