To: [Deleted]

I just noticed an alert for this female that I am currently fielding a city counsel complaint on. I have been aware of her for a couple of months and have been attempting to ID her, the problem was that she was coming out late in the evening normally and even if patrol did contact her, she was either unwilling or unable to give them much information. I was finally able to contact her the other morning and convinced her to get in my car so I could take her home. She is not violent; she just exhibits strange behavior because she appears to have schizophrenia. Normally she just walks around stealing food from garbage containers and drinking from water hoses. I am currently working with her family to get her evaluated and on medication...there is some delay since they are [Deleted] immigrants and have no medical insurance and speak very little English. This can be worked around, but it takes more contacts and resources.... I am told by her family that she was [Deleted] but has been debilitated by this disease. I will keep you posted and feel free to call if she comes on your property. For some reason she just loves to walk around the streets near her apartment. The family lives off of [Deleted].
